OBJECTIVE

As an Information Systems student at Universitas Airlangga with a focus on website development, I am passionate about crafting intuitive and engaging user experiences. With a primary interest in Website development, I am committed to continuously expanding my skills and exploring diverse areas within the tech field. I seek opportunities to contribute to dynamic projects while growing as a versatile developer in a fast-evolving industry.

EDUCATIONS

Universitas Airlangga | Information Systems | CGPA: 3.63

2022 - 2026

SMA PLUS NEGERI 17 PALEMBANG | Science

PROJECTS

UMKM DESA KARE (Web Application)

November 2024 - January 2025

- Contributed to the development of a comprehensive website for UMKM Kare Village, aimed at empowering local businesses by providing them with an online platform for digital visibility.
- Utilized React.js and Next.js for development, ensuring fast and responsive user interactions.
- Styled the website using Tailwind CSS, providing a clean, modern, and adaptable design.
- Integrated Framer Motion to implement smooth animations, enhancing the user experience and interactivity.
- Designed the database schema with MySQL, ensuring efficient storage and management of local business data.
- Focused on creating a user-friendly interface, empowering local entrepreneurs to reach a broader audience and improve their online presence.

Admin UMKM DESA KARE (Web Application)

November 2024 - January 2025

- Utilized Laravel for backend development and Filament for building a feature-rich admin panel.
- Designed and implemented 6 comprehensive CRUD modules, ensuring seamless user experience for local entrepreneurs.
- Implemented dual user role management, providing distinct functionalities for administrators and business owners.
- Deployed the application online, supporting the digital transformation of rural businesses and enhancing local economic development.

TED X Universitas Airlangga (Web Application)

August 2024 - December 2024

- Developed and maintained the TEDx Universitas Airlangga website using React and Next.js to deliver a fast, responsive experience.
- Designed and implemented responsive, user-friendly interfaces to enhance accessibility across all devices.
- Collaborated with design and development teams to ensure visual consistency.
- Ensured an optimal user experience.

Information Systems Airlangga Competition (Web Application)

April 2024 - November 2024

- Led front-end development for the Information System Airlangga Competition's website.
- Specialized in creating visually stunning and highly functional user interfaces.

Upstyle (Mobile Application)

June 2024 - August 2024

- Developed and integrated the order feature, allowing users to place orders, track order status, and receive notifications for payment and delivery updates.
- Successfully integrated Midtrans payment gateway using Firebase Cloud Functions, ensuring secure, seamless, and real-time payment processing for user transactions.
